

ECO sphere

500/800 GAL DIGESTERS

Rotoplastics Trinidad Limited has engineered a simple yet efficient treatment system that is designed to biologically purify effluent from a septic system.

Eco-Sphere Digester

A safe way to dispose of effluent

- Manufactured from impact-resistant prime grade polyethylene which ensures that this tank can withstand earth pressures and will not fracture.
- Spherical design ensures exceptional strength.
- Resistant to most chemicals and impervious to corrosion.
- 4" diameter perforated spheres increase the surface area for bacteria to thrive.
- Lightweight and compact.
- Available with an optional 20" (51cm) manhole extension for easy access.
- Environmentally friendly - breaks down the effluent so that it can safely enter the environment.
